

Results Release to MyChart

This tip sheet describes how results are released to MyChart and how to view them.

There are two ways your results are released to MyChart; automatically and manually. Depending on the type of result you are receiving will determine how it will be released.

Automatic results are either released immediately once results are received, or after a batch has been completed (time delayed) to provide a chance for provider review. Automatic results are set to run each morning at 2am.

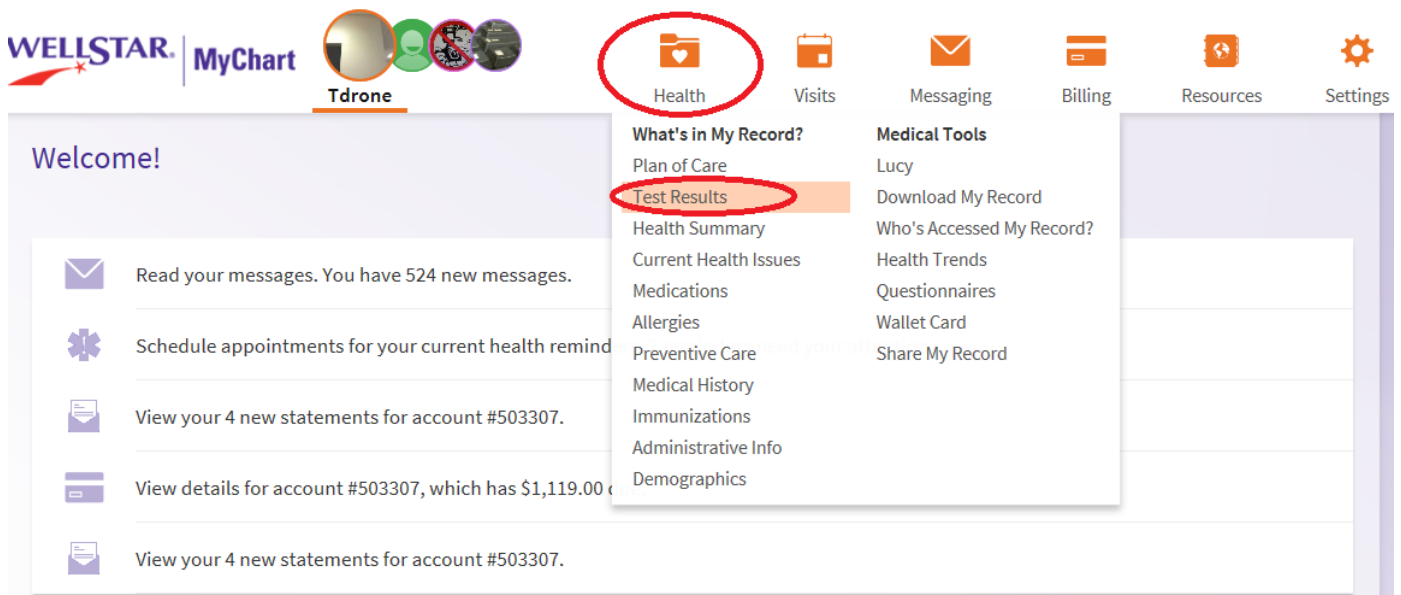

Manual results are released manually after the it has been reviewed by a provider or a clinical staff member has contacted you about your results to discuss the results.

MyChart Bedside or Inpatient results are released on a batch schedule. The current times for labs to be released are; 6am, noon and 6pm daily.

Providers and clinical staff can 'unrelease' results showing in your MyChart account if necessary.

Try It Out

1. From the home page of your MyChart account, navigate to **'Test Results'** under the **'Health'** icon.

2. From the Test Results page, you can view all released results
