

To Schedule an appointment with your provider first log into MyChart.

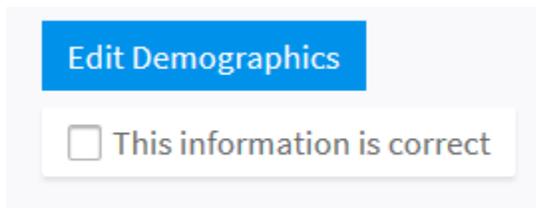

From the home page click on the Visits folder in the main toolbar at the top of the page, and then select Schedule an Appointment

You will then need to select what kind of visit you want to schedule.

Once you have selected a type of visit you will be asked to verify or update some of your information, like your address and phone numbers, your insurance information. For each of these options you can either click on the box that says this information is correct or you can edit it.

Once you have updated the information or indicated it is all correct you will need to select which location you want to schedule an appointment for. Not all offices are setup to allow for direct scheduling, if your provider has been setup you will see the locations where you can schedule an appointment. Select which location you would like and then click on Continue.

## Schedule an Appointment

Not all offices have appointment scheduling available via MyChart. If you do not see appointments available, please contact your provider's office directly.

Where do you want to schedule?
